

MTW Trapezium Mill

Based on many years' R&D on grinding machine, and considering 9518 users' suggestion, our MTW series European style trapezium mill come out to meet the milling industry trend; it owns many independent patents property, such as overall prick gear drive, internal thin oil lubrication system, arc-shaped air duct. All of these make it the most advanced milling machine in the world.

MTW Trapezium Mill Technical Advantages:

his series grinding machine is vertical structure; takes small area; strong whole-set. Moreover the main unit transmission device uses the airtight gear box, and the transmission is steady. The important part of grinding machine uses high quality steel, therefore complete machine is durable and reliable. The mill electric system uses centralized control, advanced and reasonable shape, high automaticity, small and light vibrating feeder, easy to adjust and energy saved.

MTW Trapezium Mill Technical Data:

Model	MTW110	MTW138	MTW175
Roller quantity	4	4	6
Ring inner diameter (mm)	1100	1380	1750
Main unit speed(r/min)	120	96	75
Max. feeding size(mm)	< 30	< 35	< 40
Product size (mm)	1.6 ~ 0.045	1.6 ~ 0.045	1.6 ~ 0.045
Capacity (t/h)	3.5 ~ 10	6.5 ~ 15	11 ~ 25
Overall dimension (mm)	8910×6950×9010	9860×8340×10227	13500×11500×9500
Weight (t)	18	28.5	46
